SUMMARY

Onboarding & Implementation Consultant with 10+ years in SaaS guiding clients from signup to success — owning **onboarding, technical implementation, training, and adoption** for enterprise accounts. Managed **5+ concurrent implementations totaling \$300K+ in MRR**, analyzed and improved **100+ client onboardings**, and delivered a **92% first-time resolution rate and a 15% lift in client retention**. Technical enough to own **integrations end-to-end (REST APIs, webhooks, HubSpot, Salesforce, n8n, Zapier, Make)** — and clear enough to translate them into simple, actionable guidance customers trust. Known for turning messy client requirements into **smooth go-lives, clean documentation, and long-term adoption**.

CORE COMPETENCIES

Client Onboarding | Technical Implementation | Customer Success | Training & Enablement | Platform Walkthroughs | Account Management

CRM & Support: HubSpot | Salesforce | Intercom | Zendesk | Freshdesk | Gainsight | Totango | ChurnZero | Slack | Jira | Confluence

Integrations: REST APIs | Webhooks | OAuth | JSON | Postman | eCommerce & GTM Stacks | Data Flows | Troubleshooting & Escalation

Workflow Automation: n8n | Zapier | Make.com | Workato | Airtable | Google Sheets | Process Optimization & Documentation

AI & Data: Claude Code | AI Agents | RAG / Knowledge Bases | Prompt Engineering | SQL | Power BI | Tableau | Usage Analytics

Consulting: Technical Discovery | Demos & POCs | Solution Design | Rollout Plans | Cross-Functional Collaboration

EDUCATION

Montclair State University, Feliciano School of Business, Montclair, USA

Bachelor of Science, Major in International Business with a Minor in Economics – May 2016

PROFESSIONAL EXPERIENCE

Sr. Solutions Engineer – Enterprise Implementation & Adoption (Voice AI)

Synthflow.ai

Berlin, Germany (Remote)

Jan 2024 – Present

- **Client Onboarding & Implementation**

- Own the full onboarding lifecycle for enterprise clients — technical discovery, solution design, configuration, QA, go-live, and post-launch optimization — managing 5+ concurrent implementations totaling \$300K+ in MRR.
- Run tailored platform walkthroughs and technical onboarding sessions for stakeholders ranging from marketers to engineers, adjusting depth to each audience so every client reaches value quickly.
- Create solution briefs, integration maps, rollout plans, and handoff documentation that give clients a clear, trusted path from kickoff to launch.

- **Client Consultation & Strategy**

- Advise clients on automation and AI strategy, translating vague business goals into concrete implementation plans, workflows, and success criteria.
- Deliver demos and POCs showing exactly how the platform fits each client's existing stack (CRM, telephony, support tools), accelerating buy-in and adoption.

- **Integrations & Technical Configuration**

- Guide clients through integrations with HubSpot, Salesforce, telephony/SIP, and databases using REST APIs, webhooks, OAuth, and tools like n8n, Zapier, and Make — owning setup when needed, coaching client teams when not.
- Configure AI voice agents end-to-end (prompts, tool calling, business rules, escalation and human-handoff logic) so they behave predictably in live customer interactions.
- Build workflow automations connecting lead capture, enrichment, CRM updates, notifications, and follow-ups — removing manual handoffs across sales, support, and customer success.

- **Support, Troubleshooting & Product Feedback**

- Resolve client technical questions quickly via chat and calls, diagnosing API, integration, and configuration issues with clear, non-technical explanations.
- Partner with engineering to reproduce bugs, prioritize fixes, and turn recurring client friction into product improvements.
- Improve internal documentation, knowledge bases, and implementation workflows (including automated KB updates) so every subsequent onboarding gets faster and more consistent.

Technical Account Manager – Enterprise Onboarding & Customer Success

Rayobyte.com

Lincoln, USA (Remote)

June 2022 – December 2023

- **Enterprise Onboarding & Account Management**

- o Managed 7 high-value enterprise accounts totaling \$85K MRR as the single owner across onboarding, implementation, training, troubleshooting, billing questions, and long-term account growth.
- o Helped scale enterprise operations from 5 to 20 active accounts by building repeatable onboarding playbooks, enablement systems, and automations that improved speed and delivery consistency.
- o Resolved complex API and integration issues (authentication, usage tracking, customer-side integrations) with a 92% first-time resolution rate.
- **Client Insights, Retention & Product Feedback**
 - o Analyzed 100+ client onboardings to identify recurring blockers and friction, turning customer pain points into data-backed proposals for Product and Engineering — contributing to a 15% improvement in client retention.
 - o Monitored account health with custom usage dashboards (ELK/Elasticsearch) to detect churn risk early and surface issues before escalation; supported \$120K+ in new MRR through consultative technical discovery.
- **Support Automation & Knowledge Systems**
 - o Deployed AI-powered Level 1 support agents (Freshdesk + RAG) and internal knowledge assistants, improving first-response times by 40% and helping new support agents ramp to senior-level answers faster.
 - o Built lead-enrichment and CRM workflow automations (n8n, HubSpot) that cut SDR research time by 50%.
- **Team Leadership & Process Management**
 - o Managed 5 direct reports with weekly 1:1s and coaching on account ownership, troubleshooting, and client communication; improved team productivity by 40% by standardizing and documenting repeatable processes.

PREVIOUS ROLES

- Implementation Manager at **Smartkargo.com (Sao Paulo, Brazil)** **July 2017 – June 2022**
- o Led end-to-end SaaS implementations and client onboarding for air cargo/logistics clients for 5 years — discovery, configuration, training, go-live, and post-launch support.
- Project Manager at **Schlesinger Group (Los Angeles, USA)** **July 2016 – Sep 2017**
